## elemy

Pediatric Behaviroal Helath Care. Reimagined.

After an autism diagnosis, many children experience delays in accessing behavioral intervention services: long waitlists, administrative burdens, and lack of care coordination.

Elemy is working tirelessly to change that.

Maximize Independance

Industry: 30+ days

Elemy receives a client referral from a provider. If qualified, Elemy's client-facing team will contact the family to collect insurance information to verify benefits. Clients can begin the onboarding journey on the Parent360 portal.

Industry: 10+ days

Elemy will contact the family's insurer on their behalf, and confirm benefits and eligibility for ABA therapy. Our Parent360 portal makes collecting required documentation and tracking their progress seamless for clients.

Industry: 30+ days

Upon approval, Elemy schedules an assessment to be completed by a trained Elemy clinician. Using advanced forecasting and data modeling, we are able to ensure sufficient capacity for our pipeline of clients while most competitors leverage a "waitlist" approach.

Industry: 60+ days

Elemy maintains a database of eligible in-home clinicians and begins sourcing clinicians as soon as we have a prospective client. We confirm availability and match the in-home clinician, telehealth clinician, and family via our proprietary technology platform and algorithms.
