

WELCOME

Since 1955, Lifelong Access has fought to break down barriers for each other and those who cannot fight for themselves.

Our vision is to become a community where children, teens, and adults receive holistic support through a lifetime of meaningful services.

We recognize that life has phases, from birth through maturity and in every phase of life, it's never a question of if we helped. It's how we help that truly counts. And how much we helped.

**Because our clients never outgrow us.
And, we never outgrow them.**
