

THE PROTECTIVE MEDICAL EQUIPMENT FREEDOM ACT - KIKI'S LAW SB3340/HB4848

State Senator Graciela Guzman
State Representative Nabeela Syed

Ensuring the right to wear masks, face shields, respirators, and other protective medical equipment without fear of discrimination or retaliation.

WHY IT'S NECESSARY

MASK BANS

Legislators across the nation have moved to ban masks and mask mandates, threatening public health.

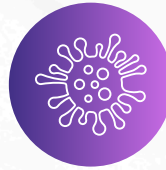

AT-RISK COMMUNITIES

Aging populations, people with disabilities, and other marginalized communities depend on masks to prevent the spread of diseases.

ENVIRONMENTAL FACTORS

Climate change and pollution bring harmful airborne environmental conditions across the state.

LONG COVID

Lasting COVID effects have caused chronic illness, disabilities, and an increased likelihood of future illness.

THE PROTECTIVE MEDICAL EQUIPMENT FREEDOM ACT prevents the denial of service, harassment, reduction in pay or hours, and other forms of discrimination and retaliation by employees and owners of places of public accommodation and public officials for wearing protective medical equipment. Mask wearers do not have an obligation to disclose health status or protected information. This Act will NOT be a mask mandate; instead, it will enshrine the right to wear protective medical equipment if an individual chooses.
